

# Opportunities Week of 1/20/17

**Mosquitoes Be Gone Internship Opportunities:** Mosquitoes Be Gone LLC is a start-up social entrepreneurship company whose goal is to develop, market, and sell an all-natural mosquito repellent and use profits to donate repellents to developing countries. The company was founded by recent Stony Brook alumna, Ruchi Shah. This is the fifth semester the internship is being offered. All interns will receive 2 academic credits.

**Application deadline is January 27<sup>th</sup>, 2017.**

For more details and application, see attached file.

**TEACHING ASSISTANT POSITION for Self-Management Workshops in Mindfulness:** Only 1 hour a week commitment, this opportunity is a great resume builder, with the possibility of a letter of recommendation upon conclusion of the semester. Undergrads and first-year students welcome

**Info sessions are being held Thursday, January 26, 2017.**

If interested, sign up for more info at: <http://bit.ly/1S7Euoj>

**WRT 305.01: Writing for the Health Professions Spring 2017 Semester:** This course will enable students interested in a healthcare career to strengthen their critical writing skills. Students also write a reflective paper which can serve as the basis for a personal statement for medical or other health-related graduate school applications.

**The course is being offered Mondays and Wednesdays, 5:30-6:50 PM. Course number 50778**

For more info on the course, please see attached flyer

**HAT 210-Introduction to Respiratory Care:** A one-credit course that makes students aware of the potential career opportunities as a graduate of the Respiratory Care program.

For more info, see attached flyer

**Internship in the Marine Physical Laboratory at Scripps Institution of Oceanography:** There is a ten-week summer internship opportunity at the Scripps Institution of Oceanography, UC San Diego, in La Jolla California. The program is a great opportunity for inquisitive and motivated undergraduate students with exceptional aptitude for quantitative science majoring in Applied Mathematics, Engineering, Physics, Chemistry, Biology and Geology to work with some of the most notable scientists in the world while earning a modest salary.

**Application deadline is February 17, 2017 at 4 PM**

More info and application can be found at <https://scripps.ucsd.edu/mpl/mpl-summer-internship-program>

**Society for Developmental Biology Choose Development! Program:** Built upon a culture of inclusiveness, the program aims to augment the diversity of undergraduate students that enter Ph.D. programs in pursuit of research careers in fields related to developmental biology. The program emphasizes professional development and research training under long-term supervision for students with disabilities and those belonging to under-represented minority groups.

**Application deadline is February 15, 2017**

For more info and application, see [http://sdbonline.org/choose\\_development#Application](http://sdbonline.org/choose_development#Application)

## Project Description

Mosquitoes Be Gone LLC is a start-up social entrepreneurship company whose goal is to develop, market, and sell an all-natural mosquito repellent and use profits to donate repellents to developing countries. The company, founded by Ruchi Shah, has been recognized by the Young Inventor's Hall of Fame, first place in the WolfieLaunch and Long Island Business Plan competitions, Forbes and Glamour's College Women of the Year.

The goal of the company is to use the novel mosquito repellent, unique in its mode of activity, to reduce the prevalence of mosquito transmitted diseases worldwide. This is the fifth semester that the internship is being offered.

As an intern with Mosquitoes Be Gone LLC, you will play an integral role in all aspects of the beginning stages of a social entrepreneurship business. During the duration of the internship, the company will be focusing on applying for large government grants, developing and branding the mosquito repellent, managing a social media presence, and forming relationships with relevant non-profit organizations.

Strong writing skills, interpersonal skills, and communication skills are required of interns. Interns with a background in science writing, product development, graphic design or science research, in addition to expertise in their specific area, are preferred.

All interns must commit to 2 academic credits. As specified in the descriptions, internships are available through WISE, the Biology Department, and the School of Business. Interns will be required to keep a journal that will be submitted at the end of the semester. Please read the various intern descriptions carefully before filling out the form below and completing all supplemental material. We look forward to creating a team of change-makers!

### Stony Brook University Program in Writing and Rhetoric Spring 2017

#### WRT 305.01: Writing for the Health Professions

This course will enable students interested in a healthcare career to strengthen their critical writing skills. While learning to gather information and to apply ethical principles in a logical, persuasive fashion, students will explore and write about various types of evidence concerning the healthcare needs of different populations: a field research project on a health issue affecting a local target population of their choice, a critique of government documents that contain data on that issue and population, and a review of scholarly research on the same issue as it affects the larger national population represented by that local one. Writing assignments will include drafts and final versions of a research proposal, field research results, data analysis, literature review and a final project incorporating all of the previous work conducted about that issue and population. Students will also write a reflective paper which can serve as the basis for a personal statement for medical or other health-related graduate school applications.

Instructor: Robert Kaplan

Course Code: 50778

Meeting Times: M/W 5:30pm-6:50pm

**Do You Enjoy Working With People?**

**Are You Interested In A High-Tech Career?**

**Want To Learn More About How You Can Make A Difference?**

If you enjoy working with people, have an aptitude for the life sciences, and are interested in a challenging and rewarding career, then the programs offered in the Department of Respiratory Care may be for you!

### ***HAT 210 Introduction to Respiratory Care***

**Register today to learn more about these professions**

This course provides an introduction to the science of respiratory care, sleep technology, and cardiac care, examining current trends in professional practice. Each student will have the opportunity to research and present a topic concerning the contemporary practice of a respiratory therapist, polysomnographic technologist, or a cardiovascular technologist. This course is specifically designed for lower-division four year respiratory care and polysomnographic technology majors. This course is not eligible for the G/P/NC option. It is open to west campus students. **The class number for Spring 2017 is 55332.**

The course is offered from 1 to 2 pm on Thursdays in the Respiratory Care Teaching Laboratories (HSC Level 2, Room 464) during the both the Fall and Spring semesters. Academic advisement will be provided for students seeking admission.

***Don't forget to ask about our freshman declared major option! Freshmen can be automatically admitted into the Respiratory Care or Polysomnographic Technology program by declaring one of these majors.***
