MS Science Communication COM 699 Proposal Template

General Information and Instructions

Course Description

A culminating experience for students in the MS in Science Communication. Students will identify and secure a faculty mentor under whom they will work independently to plan, design, and complete a research-based, science communication project. The project should reflect what students have cumulatively learned in the program and respond to the needs of an organization, community, or stakeholder group. Projects may take the form of original research intended for submission to an academic conference or translational research that informs the content development for a specific audience (e.g., educational module, communication campaign, social media strategy, etc.). Each project will have written, visual, and/or interactive components. Students will formally present their work to peers, faculty, and members of the campus/community at the conclusion of the course.

Registration Process

Your project proposal must be approved by the graduate committee before you are given permission to register for COM 699. The graduate committee reviews proposals once per semester, so your proposal must be submitted the semester BEFORE you plan to register for COM 699. Submission deadlines are as follows:

Fall Submission Deadline: October 1Spring Submission Deadline: March 1

Before completing this proposal you should identify a faculty mentor for your COM 699 project. Your faculty mentor should be a full-time faculty member in the School of Communication and Journalism with content-area expertise on the topic you wish to pursue for your research project. Your faculty mentor will guide you through the proposal submission process, review your work before it is submitted to the committee, and oversee the implementation of your project. Although you will work mostly independently, your faculty mentor will be your first point of contact for this class. You may approach a faculty member on your own, or discuss options with your program head. Once you have secured your faculty mentor, you can work with them to complete the proposal template below.

Project Justification and Goals What do you hope to accomplish with this project? Why is there a need for this project? What gap in service or gap in the literature will this project fill? If applicable, how will you use the research part of this project to inform the development of a larger science communication activity (i.e., educational module, communication campaign, social media strategy, etc.)?

Research Participants Who do you plan to recruit for your study and why? List specific inclusion and exclusion criteria. How will you recruit these participants? How many participants do you hope to recruit? Why? If you are not recruiting participants, please describe the nature of your data.

Data Collection & Analysis Is your study quantitative, qualitative, or mixed-methods? Why do you believe this is the best methodology for this particular project? How will you collect your data and what software programs will you use? How do you plan to analyze your data in a systematic way?

Science Communication Integration How do you plan to integrate what you've learned in your science communication classes into this project? Be specific and include examples where you can.

Proposed Activities & Timeline

Complete the table below as needed to create a timeline and description of all activities, including all meetings, deliverables, presentations, etc. Be sure to include a proposed completion date. This timeline will serve as a course schedule and agreement between you and your faculty mentor.
